Print out this Mystery Mineral Word Search and try to find these eight common minerals:

malachite	**olivine**	**azurite**	**quartz**
calcite	**gypsum**	**pyrite**	**chrysocolla**

The words are forward or down. Draw a line around each word as you find it and list it in the spaces below. Then arrange the circled letters to spell the mystery mineral. (Hint, it is the state mineral of Arizona.)
